## Rebuilt CATERPILLAR Motor Graders available!

Meticulously Rebuilt Caterpillar 140G, 140H and 140K Motor Graders now available from Pro-Pak!

WORLDWIDE SHIPPING arranged at competitive prices.

### Some advantages of Rebuilt Graders:

**The Most Intelligent Alternative.** Purchasing a rebuilt grader means that you'll benefit from the same performance and reliability you'd get with a new machine, but at a fraction of the cost. It also eliminates the potential downtime and worries associated with buying a used machine "as is".

**Superior Quality.** Our graders are subject to an extremely comprehensive "bare frame up" reconditioning process. We adhere to original equipment manufacturers' (OEM) specifications and all our graders undergo rigorous testing.

**Reliability.** Our motor graders are reliable and built to stay that way.

**Affordability.** Our rebuilt motor graders are 40% to 60% cheaper than comparable new machines, despite delivering identical performance levels.

**Appearance.** With a craftsman's touch and a passion for precision, we restore graders to the same aesthetic standards as brand new machines.

**After-Sales Service.** Once you've taken delivery of a grader, we continue to provide support and advice, ensuring you get optimal value from your investment. We carry a full range of parts for the graders.

**Resale Value.** A motor grader from us isn't just a dependable workhorse. It will also have high resale value if you decide to sell it.
